WELCOME

The “Socratia Exorhiza” palm is unique because it moves from one place to another until it reaches more sunny places. The way it moves is to grow new roots in the foreground, while the old ones die and are displaced. The distance covered in a year may be 20 meters. This strange roaming plant is found in Central American countries of Nicaragua, Costa Rica and Panama. No doubt the rest of the plant world talks of how this wandering palm has such a longing heart, always seeking the sun. Could it be our lesson from Central America? Is there a longing in your heart for the Son? Welcome to Campion.
