WELCOME

This Christmas, thousands of people will receive a little box under the tree that has the potential to drastically upset their lives. Over the last 10 years, the at-home genetic test has grown into a multi-million dollar industry, with estimates of growth to \$10 Billion by 2028. Many of those taking these tests have learned of family members they never knew existed, while others have discovered long-hidden family secrets. None of us can pick our families of origin, but most of us want to understand something of where we've come from. But there was One who could pick His family. And the ones He picked have left some scratching their heads. Of all the people in the world, why did you pick *them*, Jesus? [Welcome to Campion.](#)
