## WELCOME

It's the shape of a butterfly and quietly works like one. You don't know it is there...until it doesn't work right. It's the little gland in your neck called the thyroid. Too much or too little of its work and the two hormones (thyroxine and triiodothyronine) that it produces and secretes into our bloodstream will influence all the cells and tissues of our body. A quiet little butterfly shaped gland has that kind of influence. Moral of the story -- your life, simple or quiet as it may seem to you--can and will have an influence. Then to each comes the call from Jesus, to have gospelence (made up word for influence with the gospel - the hope of Jesus). Welcome to Campion.
