WELCOME

Astrophysicist Greg Laughlin from the University of California, developed a special formula for determining how much worlds are worth. There is not Kelly Blue Book for this kind of thing. Laughlin's calculations put the value of planet earth at \$5,000,000,000,000,000 (quadrillion), making it the most expensive planet in the solar-system (Mars came in at a modest \$16,000). He urges that this price tag is a reminder that since every inhabitant of earth freely inherits it, it is our most important family heirloom. Could it be that what is most valuable in the universe we all get without cost? Now this is eternal life: that they know you, the only true God, and Jesus Christ, whom you have sent. (John 17:3). Knowing God and the resulting eternal life comes without cost (Isaiah 55:1). Thank you for the organizations and individuals in our community, who share that news through tangible love and compassion. Welcome to Campion.
